

Description

INCOBends® Letezl facade offers endless possibilities for the composition of the facade. The possibility of modifying the dimensions, geometry and finish colors given as result-based facades fragmentation or continuity, vertical or horizontal, order or randomness, etc.

INCOBends® Letezl consists on a model piece with two levels and varying widths that together form a unique geometric pattern. In addition to the pieces of preset dimensions, it is also possible to configure parts of special measures tailored to specific projects. This allows the architect or designer a great compositional freedom in the final result of the facade.

All fixings are hidden. This product can be used both in ventilated facades and non-ventilated.

Surfaces finishing*

- Galvanised Steel
- Pre-lacquered Steel(Plastisol, PVDF...)
